

Auto-Trac®

Self Tightening Traction Chain

For passenger car and light truck applications

Auto-Trac® can be installed without moving (or jacking up) the vehicle! The patented, ratcheting tightening system automatically tightens the chain while driving. Just connect the inside cable, attach the two outside self-tighteners and drive! No additional chain tighteners are necessary or recommended.

Auto-Trac® will meet Class "S" clearance requirements on SUVs and pickup trucks, as well as normal passenger cars (matching the capabilities of most of our "Z" cable products). This is possible because of a highly effective, patented tensioning system.

Auto-Trac® cross member links are made of manganese alloy steel, allowing them to be shorter, narrower and lighter than conventional cross members. This reduces "fly-off" during operation and provides more gripping points. The low-mass "D" cross section of the links also contributes to longer wear because the impact of the cross members on the road surface is reduced and the surface area contacting the road is increased.

Self-tightening ratchet

Link Chain

The Auto-Trac® advantage: It automatically adjusts and tightens while you drive!

To summarize, here are Auto-Trac's highlights:

- Meets Class "S" clearance requirements, even in light truck sizes.
- Easy installation and removal, with no need to move the vehicle and no need to manually re-tighten after installation.
- Better all-around traction performance and a smoother ride than conventional traction products.
- Best durability of any link-style chain for cars and light trucks.
- Auto-Trac® provides excellent compatibility with ABS and traction control systems.
- Convenient nylon carrying/storage case.

Covered by U.S. and international patents

Chain tighteners ARE NOT NEEDED.

Auto-Trac® (Passenger)

Meets S.A.E. Class "S" Requirements
